

Editorial

In today's world, there are many urgent problems that need to be resolved, fulfilled and fixed which are being faced by the society. India is a developing nation and we have to compete with other advanced nations. Therefore, we will have to go for extensive research and innovation works to solve the problems faced by the Indian society. Since the research problems are not only from a specific field of study, therefore they are more complicated and are of interdisciplinary and multidisciplinary nature. The NEP 2020 in India is focusing on multidisciplinary and interdisciplinary education and research system.

This inaugural issue of the journal "The Rational Instinct" published by the Teachers' Unit, on the occasion of Diamond Jubilee Year of Mariani College endeavours to attract researchers from various fields from multidisciplinary and interdisciplinary perspectives.

We hope this journal will attract, help and promote research and innovations from diverse fields like social sciences and humanities, science, technology and engineering, management and commerce and the emerging fields of cutting edge research.

This journal will serve the society by helping students, academicians, researchers and the general public who wish to undertake research and development.

The editorial board members are indebted to all those who inspired and helped us to publish this inaugural issue on the occasion of Diamond Jubilee Celebration 2025-26 of Mariani College.
